

BRITE DECK CLEANING GUIDE

Brite deck is designed, so that you can have your 'me' time for yourself so you can relax and enjoy. Hence why the maintenance is not an issue.

Here is a guide to how you can clean you decking occasionally.

Cleaning with high pressure hose.

Required Items for cleaning:

- Soap Cleaner
- Water
- Bucket
- Sponge
- Hard Bristled Broom
- High Pressure Water Washer

Step 1:

Apply soapy water to your deck with a sponge.

Step 2:

Sweep the deck using Hard-bristled broom in the direction of the grain, and clean to remove all the dust in between the gaps of the decking.

Step 3:

If you still have any stubborn dirt or residue use high pressure hose and pump over the deck to remove any unavoidable residue. (this is a very effective way to clean hard dirt). We recommend Karcher Hi-Pressure Water Washer.

Deck Maintenance

- Keep the deck dry and clean.
- Clean any strains on the deck immediately so that the strain doesn't become stubborn.
- Do not let organic matter build up on your deck.
- Its best to remove any waste by picking up rather than dragging on the floor.
- Position dryer vents away from your deck.
- Use a splat mat underneath your grill area to help protect your deck from fatty marks and stains.
